

# Recycling and Rubbish

## **We try to recycle as much as we can at Bosinver...**

You'll find a large bag in your cottage to store recycling in as you collect it. Please rinse and crush cans, tins and plastic bottles. **The recycling bins are on the entrance drive in the wooden fenced compound behind the fir trees just before the office.** We'd be grateful if you could put your recycling in these bins when you pass by.

## **What you can recycle**

There are two bins for dry mixed recycling i.e. all types of paper, cardboard, newspapers, cans, tins and plastic which are then sorted by our recycling company.

Please keep glass separate and put it in the glass recycling bin.

## **Compost**

You can compost everything at Bosinver (except animal bones) and we use the compost as fertilizer for our vegetables and gardens. There's a compost caddy in your kitchen with a green compost recycling bag - please place your food waste in here prior to taking it to the large compost bins in the vegetable garden. The compost bins can be found to the left hand side of the washing lines and are accessible via the path to the right of the Farmhouse (look for the sign).

**Please only use the compost bin marked 'Use this bin'** (because we rotate them to speed up the composting process) and **dispose of the plastic bag separately in the dustbin alongside**, as we find they don't break down quickly enough to leave them in the composters. If you need more composting bags please just ask in reception.

## **Rubbish**

We'll collect your non-recyclable rubbish from the bin outside your cottage mid-week and at the end of your stay. We try to keep an eye on the bins from day to day but if you find your bin is getting rather full, please do let us know. It would be a great help if you could use supermarket carrier bags as kitchen bin bags. Please double-wrap any items such as soiled nappies and dog waste to provide as good a seal as possible. Please ask in reception if you need additional kitchen bin liners.

## **Leftover food**

If you've got any food left over at the end of your stay, please don't throw it away. We'll use or compost anything you don't want to take with you - just leave it on the kitchen worktop or in the fridge/freezer of your cottage.

**Please don't throw bread for the birds as we don't want to attract vermin to the farm.**
